

Trimline Woody Grid

The Trimline Woody Grid wood stove is a sleek, yet flexible model from the Woody wood stove series. The stove has the option of connecting the pipe both at the top and at the back. With an efficiency of 80%, this stove more than meets the requirements of the new European label "Eco Design". Approved according to EN 13240/A2.

The fireplace is standard available with a small, square block or larger rectangular block. In addition, we have put together different sets in order to realize your unique arrangement.

For the square block is also a door including shelves available.

Efficiency	80%
Heat capacity max (kW)	6,4
Heat capacity min (kW)	2,5
Weight (kg)	75
Wood usage (kg/hour)	1,84
